Même mire 3D, même pose, cinq lois de projection

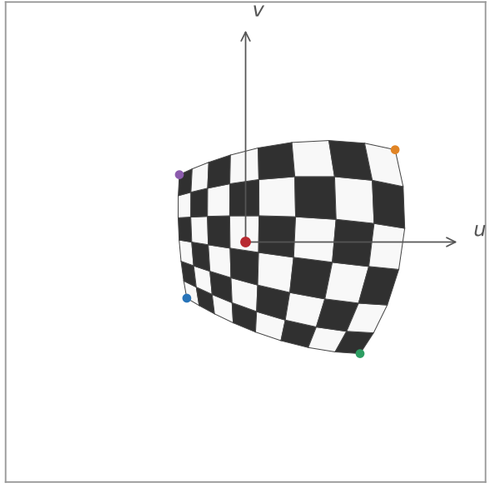

Rectiligne
$q(\theta) = \tan\theta$

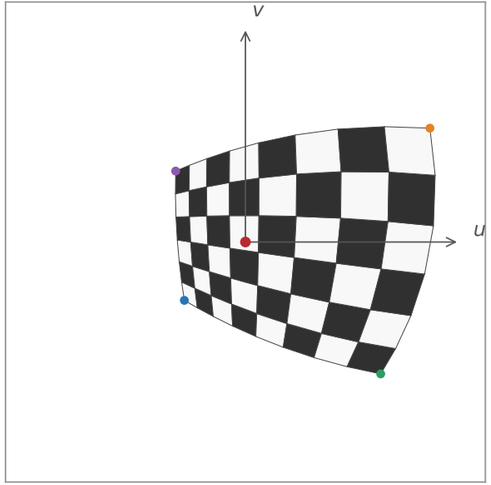

Équidistante
$q(\theta) = \theta$

Équisolide
$q(\theta) = 2\sin(\theta/2)$

Stéréographique
$q(\theta) = 2\tan(\theta/2)$

Orthographique
$q(\theta) = \sin\theta$
